

Load Transfer Equipment (LTE)

Impress your clients and easily complete projects with our range of well-designed and carefully manufactured materials handling equipment.

- We serve as a manufacturing partner for engineers, consultants, and other professionals who develop and provide materials handling solutions to clients that operate warehouses, sorting hubs, and other logistics facilities.
- Manufactured equipment is supplied to the trade at OEM pricing, and on an NDA basis as required.
- For almost two decades, we have been supporting the industry with well-designed and carefully manufactured transport and materials handling equipment.
- Our customers come first. We offer personalised service, coupled with our operating ethos based on trustworthiness, accountability, innovation, and integrity.

Materials Handling Products

Conveyors, Chutes, and Structures for Logistics Facilities

- Conveyors (single-decker, double-decker, inter-floor, etc.)
- Parcel Chutes (straight or curved) to complement conveyor systems
- Rollers (gravity or motor-driven)
- Carousels
- Mezzanines
- Catwalks
- Staircases
- Cat (Cage) Ladders
- Steppers
- Maintenance Platforms
- Bollards
- Ramps

Most of our materials handling equipment is designed, drawn, and engineered by a well-known and highly regarded 30-year industry veteran.

We take these designs and manufacture the items to an extremely high standard, ensuring that they are top quality and completely fit for purpose.

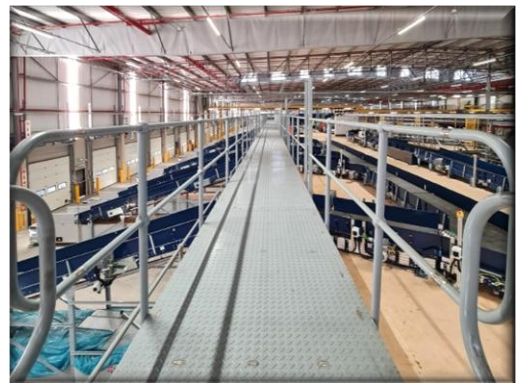

Contact us now to discuss your materials handling equipment needs.

Current and past customers include:

- Dischem
- Clicks
- UPD

- DSV
- Solutions 4 U
- Cotton On
- Soviet
- Lilac Automation
- Apex Solutions
- Rulemeca
- BMG

A Bit More About Us

Steelwork is our passion, and our vision is to be market leaders, not followers.

We started out building heavy-duty commercial trailers and truck bodies in 2008. In 2021, we expanded into the design and manufacturing of quality logistics and materials handling equipment (conveyors, chutes, structures, etc).

We design and develop in-house products that are comparable to the best South Africa has to offer, and can also compete with international offerings.

Every product we make is subjected to stringent quality control systems at each stage of the manufacturing and assembly process.

Our pricing is highly competitive, and our clients receive excellent after-sales service and support.

Management Team

Ockert Britz – CEO

Ockert has worked in the steel fabrication and manufacturing sector since 1996.

He also began importing and selling commercial trailers several years ago.

This evolved into building trailers and truck bodies locally, and from there, he branched out into manufacturing materials handling equipment, drawing on his experience in steel fabrication.

Kirk Nash – Advisor/Consultant

Kirk has over two decades of experience working with automation and data analysis in retail, logistics, and related environments.

He brings a wealth of knowledge and a deep understanding of operational processes and implementation to the table, especially valuable when it comes to manufacturing items for materials handling facilities.
